EDUCATION

University of Nevada, Las Vegas

College of Engineering, B.S. Computer Science

2024

- Cumulative GPA: 3.60
- Coursework: Operating Systems, Compiler Construction, Algorithm Design

CERTIFICATION & AWARDS

CompTIA Security+ 2026
KCNA: Kubernetes and Cloud Native Associate 2025
1st Place in the UNLV Engineering Senior Design Competition 2024

SKILLS

Programming & Automation: Python, PowerShell, Ansible, Selenium, Shell Scripting, C++, Java, Go, Lua, L^AT_EX

Containers & Platform Engineering: Kubernetes (Red Hat OpenShift), Ansible Automation Platform (AAP), Proxmox VE, Velero, OADP, Loki, MinIO

Windows Infrastructure: Windows Server, Active Directory, Group Policy, DNS, DHCP, SCCM, Windows Administration

Virtualization & Hardware: VMware vSphere, HPE ProLiant, iLO, RAID

Identity & Access Management: Microsoft Entra ID (Azure AD), Duo MFA, Privileged Access Management (PAM)

Security & Operations: CrowdStrike Falcon, Qualys VMDR/CSAM, Exabeam SIEM, Carbon Black, Microsoft Defender, Data Loss Prevention (DLP), Vulnerability Management

Enterprise Platforms: ServiceNow, Jira, Sharepoint

EXPERIENCE

Credit One Bank

Las Vegas, Nevada

IT Leadership Associate

Jul 2024 – Present

- Engineered Python automation that correlated 1,500+ unmanaged CrowdStrike assets and 10,000+ Qualys assets, eliminating manual creation of 200+ Falcon sensor installation Jira tickets.
- Automated Kubernetes disaster recovery across multi-datacenter environment using Ansible Automation Platform, replacing manual failover tasks with repeatable workflows that reduced operational risk.
- Developed PowerShell and Microsoft Graph API automation validating 90%+ of AccessIQ identities against Active Directory and Dayforce, significantly reducing manual access reviews.
- Modernized privileged account provisioning by migrating legacy Azure AD automation to the Microsoft Graph API, preserving integrations with Active Directory, Duo, and PAM systems.
- Developed Python/Selenium automation to collect monthly IT audit evidence across security platforms, standardizing compliance artifacts while reducing repetitive manual effort.

- Deployed centralized logging for production OpenShift clusters using Loki, enabling searchable application, infrastructure, and audit logs to improve troubleshooting and observability.
- Deployed HPE ProLiant Gen11 servers replacing end-of-life security camera infrastructure by configuring secure iLO management, RAID, and Windows Server provisioning.
- Implemented production backup and disaster recovery workflows for OpenShift using OADP and Velero, strengthening application resiliency across enterprise Kubernetes environments.
- Supported enterprise infrastructure spanning 2,000+ Windows servers and across multi-datacenter OpenShift clusters, contributing automation, platform administration, and disaster recovery initiatives.
- Completed 220+ ServiceNow requests and 200+ Exabeam investigations while administering Active Directory, endpoint security, and privileged access across 19,000+ managed assets.

Credit One Bank

Windows Sysadmin Intern

Las Vegas, Nevada

Jun 2023 – Aug 2023

- Deployed and managed DHCP servers with load-balanced failover for high availability
- Automated DHCP deployment and validation using PowerShell
- Resolved Windows File Server issues involving locked files, shares, and permissions
- Effectively leveraged vSphere to streamline the deployment and management of Credit One Bank's infrastructure

PROJECTS

Kompare | [GitHub Link](#)

2025

- Extended an open-source Go CLI to support OpenShift Routes and CSV export, enabling comparison of production and disaster recovery Kubernetes clusters.
- Developed Kubernetes and OpenShift API integrations to compare cluster resources across environments, improving validation of enterprise OpenShift deployments.
- Contributed production-ready enhancements to an existing open-source infrastructure tool using Go and the Kubernetes client libraries.

RoadWatch | [GitHub Link](#)

2024

- Collaborated on a 10-member Agile team to develop a Progressive Web Application for community road hazard reporting using React, TypeScript, Material UI, and Vite.
- Developed a multi-step registration workflow with reusable React components, backend account creation integration, and standardized styling through automated Stylelint compliance.
